Espectrofotometro de Absorpci3n Atomica y Emisi3n AAS SAFAS AA191: alta calidad y precio interesante

El espectrofotometro de absorpci3n atomica y emisi3n SAFAS AA191 tiene una sensibilidad muy elevada, y es muy robusto y fiable; tambi3n tiene un software muy completo sobre el largo LCD display permite hacer gamas de calibracion, crear metodos, identificar y medir a series de muestras con impresion automatica.

Disculpe, esta pagina ya no est3 disponible en Espa3ol.

AA 191

AN AA SPECTROPHOTOMETER, RUGGED AND RELIABLE, WITH OUTSTANDING SENSITIVITY AND LOW COST

SAFAS Atomic Absorption spectrophotometer AA191 has a very high sensitivity, with very low maintenance needs and ownership costs.

Fitted with a linear optical system with reduced number of reflections, it will bring to your lab excellent sensitivity and reproducibility, particularly on the elements whose peaks are located in the UV.

EXCELLENCE IN OPTICS AND MECHANICS

The combination of the linear optical design, of the single-mirror high aperture EBERT mount monochromator, and of the micrometric screw driven grating, bring excellent linearity, reproducibility and energy.

The AA191 AAS has a spectral range from 190 to 900nm; with a particularly high sensitivity at the most difficult wavelengths. Three bandwidths are available to the users: 0.2nm, 0.7nm and 2nm. A turret for 3 lamps, with individual pre-alignment and preheating, enables to promptly switch from one element to another.

MANY ACCESSORIES AND OPTIONS ARE AVAILABLE

Many accessories are optionally available: Hollow Cathode Lamps, Standard solutions, Nitrous Oxide burner, stainless steel exhaust device, oil free air compressor, pressure regulators, etc...

A BUILT IN COMPUTER FITTED WITH A POWERFUL AND EASY-TO-USE SOFTWARE

The embedded software enables to easily achieve all the classical measurements in Atomic Absorption and Emission, particularly building calibration curves, measuring series of samples (with or without replicates), with or without report, and to create and save hundreds of methods. The instrument is delivered with a library of more than 200 methods.

SAFAS - FABRICANTE DE ESPECTROFOTOMETROS UV, VISIBLE, AA, INFRA ROJO, ESPECTROFLUORIMETROS, LUMINOMETROS,
LECTORES DE MICROPLACAS, ANALIZADORES

SAFAS Monaco - Société Anonyme de Fabrication d'Appareillages Scientifiques
